

SRV Series Relief Valves

Low Pressure Relief Valve – SRV30

- Max. Working Pressure : 300 psi (21 bar)
- Cracking Pressure Range : 10 to 250psi(0.68 to 17.2bar)
- Orifice : 0.19 in. (4.8 mm)

High Pressure Relief Valve – SRV60

- Max. Working Pressure : 6000 psi (413 bar)
- Cracking Pressure Range : 50 to 6000 psi(3.4 to 413 bar)
- Orifice : 0.14 in. (3.6 mm)

Materials of Construction

Component	Material
Cap Plug	Polypropylene
Cap	SS316 / A276
Bonnet	SS316 / A276
Stem	SS316 / A276
Poppet	SS316 / A276
Seal	FKM (Standard)
Body	SS316 / A182

Applications

SRV series relief valves gradually open as pressure increases.
SRV series relief valves have not certified to ASME or any other codes.

Operation

SRV series relief valves open when the system pressure reaches the cracking pressure and close when the system pressure falls below the cracking pressure.

Cracking Pressure

Cracking pressure range of each valve after initial relief. (whichever is greater)

- Below 60°F (15°C) : ± 6 psi (0.4bar) or ± 20 %
- 60 to 80°F (15 to 26°C) : ± 3 psi (0.2bar) or ± 5 %
- Above 80°F (26°C) : ± 6 psi (0.4bar) or ± 20 %

Pressure – Temperature Ratings

Ratings are limited depending on the material. Valves are standard with FKM Seat and Seal.

Relief Valve - SRV Series

- The valve contains a spring, and the set pressure must be adjusted. It is possible to supply after setting pressure to desired pressure.

Spring Kit

- Spring kits include spring, label, lock wire with lead seal and replacement instruction

Seal Kit

- Seal kits include poppet, bonnet assembly and replacement instruction
